

**1.2 BILLION people lack clean water
today.
A child dies every 8 seconds to water-born
disease.**

***** Study the clean water in front of you, carefully, as if
seeing it for the first time. Study the dirty water and imagine
that being your drinking water.***

**How often do I see or use clean water without thinking a
second thought?**

***Lord, help me to be aware of the blessing of clean water in
my life. I confess that I have taken it for granted.***

**Consider the amount of time and energy is spent on walking
miles to the nearest well. Consider what that means for
families across the world.**

**Spend time in prayer for those without access to clean water.
Pray for their health. Pray for their safety as children walk
miles for water each day, often alone. Pray for the Church to
rise up to raise money for clean water across the world. Ask
the Lord how He may be choosing to use YOU in providing
clean water to others.**
