

There are less than 3 doctors PER 10,000 people in many African nations.

*****Check out the number of doctors in your area and their various areas of specialty.***

Consider your own access to medical care and how you may have taken it for granted in the past.

Imagine being sick and knowing there was not a doctor anywhere to be found. Imagine your child or mother being sick and not being able to go to the doctor.

Pray for those throughout the world who lack access to medical care. Pray for their health.

Take a sheet of paper or notecard and write a short note to a local doctor asking them to donate medicines that can be sent to an orphan carepoint or HIV/AIDS carecenter in Africa.
